Date: March 1, 2018
To: Oriflow Customers
Subject: Orifice Plate Recalibration

Orifice plates manufactured by Oriflow are difficult to modify or damage. The calibration interval is 5 years. If the authority having jurisdiction (AHJ) requires an interval less than 5 years, orifice plates may be sent to us for recalibration. Contact us for pricing and turnaround time. If you are unsure of when your plate was calibrated, we can look that up for you.

Each orifice plate comes with a calibration certificate from the factory that lists the orifice bore diameter, which can be verified by measurement.

This letter supersedes any previous letters on this topic. Please feel free to call or email with any questions.

Regards,

A handwritten signature in black ink, appearing to read "John B. Gierzak". The signature is fluid and cursive, with a long horizontal stroke at the end.
